

CDM recommendation form for proposed standardized baselines (Version 01.0)

(To be used to make a recommendation to the Board regarding a proposed standardized baseline.)

SECTION 1: GENERAL INFORMATION

Title of the proposed standardized baseline:	New standardised baseline for charcoal projects in the clean development mechanism
Submitting DNA:	Uganda
Developer of the standardized baseline: <i>(Parties, project participants, international industry organizations or admitted observer organizations)</i>	Perspectives GmbH on behalf of Republic of Uganda
Party or Parties to which the standardized baseline applies:	Republic of Uganda
Sector to which the proposed standardized baseline applies: <i>(the sector according to the definition of sector in the "Guidelines for the establishment of sector specific standardized baselines")</i>	Production of charcoal supplied to households/communities/small and medium enterprises (SMEs).

SECTION 2: RECOMMENDATION ON THE PROPOSED STANDARDIZED BASELINE

The following recommendation is made by the secretariat and/or the Meth Panel: *(please check)*

- Approve the proposed standardized baseline; or
- Requires further input (e.g. additional information or modification to the submitted documentation) from the DNA; or
- Not to approve the proposed standardized baseline.

The recommendation was made, in accordance with the procedures, as follows: *(please check)*

- The secretariat prepared a draft recommendation and the two appointed members of a panel or working group independently assessed and agreed to the draft recommendation; or
- The secretariat prepared a draft recommendation and at least one of the two appointed members of a panel or working group disagreed with the draft recommendation or requested it to be considered by a panel or working group. The panel considered the draft recommendation and finalized it.

A. Approve the proposed standardized baseline

The standardised baseline was evaluated based on original submission, further inputs provided by DNA and the approved small scale methodology AMS.III.BG- 'Emission reduction through sustainable charcoal production and consumption'.

The baseline emission section is changed in the standardized baseline, as compared to original submission of PSB0001. The main change is the use of "emission factor for the substitution of non-renewable woody biomass by similar consumers" in accordance with AMS.III.BG.

B. Requires further input from the DNA	
Not applicable	
C. Not to approve the proposed standardized baseline	
Not applicable
