

**CDM-PA9376-RULE01**

## Ruling note

---

# Rationale for the rejection of PRC-9376-001

Version 01.0

**United Nations**  
Framework Convention on  
Climate Change

1. The CDM-Executive Board decided to reject the proposed request for post-registration changes for project activity 09376 on 24 July 2015, during its eighty fifth meeting, in accordance with the Clean development mechanism project cycle procedure (CDM-EB65-A32-PROC, version 07.0), paragraphs 160 and 161 (the procedures).
  - (a) The request for post-registration changes “PRC-9376-001: Wind Power Project at Tadas, Karnataka”, proposed the following changes
    - (i) Change the project activity to supply power to individual users instead of the grid;
    - (ii) Revision of description of monitoring parameters and monitoring plan; and
    - (iii) Correction of the plant load factor.The Board decided that the post-registration changes in its current form as proposed by the PP cannot be accepted.
  - (b) The PP may resubmit the changes to the registered CDM project activity as per paragraph 136-146 of PCP version 7.0, providing more justification to change the plant load factor. The PP/DOE may supplement the request with actual data of the plant load factor after the implementation of the project activity.
