Port-Louis

(Attn: Mr Chamillal)

Dear Sir,

Calculation of National Grid Emission Factor for Mauritius

We refer to the consultancy work carried by Dr Prakash (Sanju) Deenapanaray of Ecological Living in Action Ltd (ELIA) for the computation of the National Grid Emission Factor for Mauritius. We hereby like to confirm that the fuel consumption and electricity generation data were provided by the CEB. All the data related to fuel consumption and electricity production for the national grid is compiled at the CEB and disseminated to other institutions like Statistics Mauritius Ltd to be used in their publications. Similar data are also published in the CEB's Annual report.

With regards to the National Grid Emission factor, the requisite data were compiled in a form required for the computation and submitted to the consultant for his analysis. The data is obtained through calibrated meters and verified internally at the Production Department of the CEB. The data are then circulated to other CEB departments on a monthly basis in the form of Generation Progress Report (GPR) and Operational Reports (OR). Verification of the data is also carried out on a daily basis at the system control section of the CEB. The Independent Power Producers (IPP's) submit their data to the CEB as part of their obligations under the Power Purchase Agreements (PPA's) signed with the CEB.

We thank you for your usual collaboration and will be pleased to submit any additional information you may require on this matter.

Yours faithfully,

A handwritten signature in blue ink, consisting of a stylized 'S' followed by a horizontal line and a small flourish.

S.K Thannoo

General Manager

CC: Ag Permanent Secretary, Ministry of Energy and Public Utilities
