

CDM-EB86-A17-RECO

Recommendation

Assessment of applicability of the modalities and procedures contained in decisions 5/CMP.1 and 6/CMP.1 to project activities involving revegetation

Version 01.0

United Nations
Framework Convention on
Climate Change

1. Recommendation on the assessment of applicability of the modalities and procedures contained in decisions 5/CMP.1 and 6/CMP.1 to project activities involving revegetation

1. Following the request contained in decision 7/CMP.10 “Outcome of the work programme on modalities and procedures for possible additional land use, land-use change and forestry activities under the clean development mechanism”, the Executive Board of the clean development mechanism (hereinafter referred to as the Board) assessed the applicability of the modalities and procedures contained in decisions 5/CMP.1 and 6/CMP.1 to project activities involving revegetation, based on the definition contained in decision 16/CMP.1 annex, paragraph 1(e), including in areas with agroforestry and silvopastoral practices where the established vegetation is not likely to reach the forest thresholds selected by the host Party under decision 5/CMP.1, annex, paragraph 8, in the event that such project activities would be eligible under the clean development mechanism.
2. The Board agreed that the modalities and procedures contained in decisions 5/CMP.1 and 6/CMP.1 are not applicable, mutatis mutandis, to revegetation project activities referred to in paragraph 1 above.
3. The Board further agreed that, without further guidance from the CMP about the type of revegetation activities that would be eligible and their parameters to be defined to guarantee the environmental integrity of the CDM, it is not possible to indicate whether new modalities and procedures for revegetation need to be developed and/or which existing or new sections of the modalities and procedures need to be applied.
