

**Proposed standardized baseline recommendation form
(Version 02.0)**

**INFORMATION TO BE COMPLETED BY THE TWO SELECTED MEMBERS OF THE PANEL/ WORKING GROUP
OR THE PANEL/WORKING GROUP**

Title of the proposed standardized baseline:	Standardized baseline for efficient charcoal production in Senegal
Reference number of the proposed standardized baseline:	PSB0034
Name(s) of the Party or Parties to which the proposed standardized baseline applies:	Senegal
DNA submitting the proposed standardized baseline:	Ministère de l'Environnement et du Développement Durable (MEDD), Direction de l'Environnement et des Établissements Classés Senegal
Name(s) of the proponent(s) of the proposed standardized baseline: <i>(Parties, project participants, international industry organizations or admitted observer organizations)</i>	Ministère de l'Environnement et du Développement Durable (MEDD), Direction de l'Environnement et des Établissements Classés Senegal
History of the submission:	1 st submission on 23/11/2015
Date (DD/MM/YYYY) when the recommendation is completed:	23/09/2016

Approach for the development of the proposed standardized baseline:

- The "Guidelines for the establishment of sector specific standardized baselines"
- A methodological approach contained in an approved baseline and monitoring methodology (AMS-III.BG.: Emission reduction through sustainable charcoal production and consumption. Version 3.0)
- A methodological approach contained in an approved methodological tool (Please specify below the exact reference (title and version) of the approved tool _____)
- The "Guideline: Establishment of standardized baselines for afforestation and reforestation project activities under the CDM"

Important conditions under which the proposed standardized baseline is applicable:

The standardized baseline can only be used in conjunction with the latest approved version of the small-scale methodology AMS-III.BG "Emission reduction through sustainable charcoal production and consumption".

All the applicability conditions of the small-scale methodology AMS-III.BG shall apply.

The produced charcoal is supplied to identified consumers for thermal applications included in the project boundary.

Summary description of the proposed standardized baseline:

This standardized baseline provides:

a) Default values for baseline emissions parameters based on the approved small scale methodology AMS-III.BG "Emission reduction through sustainable charcoal production and consumption", including the value for the parameter f_{NRB} .

b) A positive list of measures and technologies that are deemed as automatically additional.

Recommendation to the Board:

To approve the draft standardized baseline

Not to approve the draft standardized baseline

Reasons for not approving the proposed standardized baseline:

Any other issues arising from the review of the proposed standardized baseline:

The DNA of Senegal has confirmed their intention to apply the value of 85% for parameter fraction of non-renewable biomass (f_{NRB}), which has been approved at the CDM Executive Board and also endorsed by the DNA of Senegal.
