

Proposed standardized baseline recommendation form (Version 02.0)

INFORMATION TO BE COMPLETED BY THE TWO SELECTED MEMBERS OF THE PANEL/ WORKING GROUP OR THE PANEL/WORKING GROUP						
Title of the proposed standardized baseline:	Grid Emission Factor for Grenada					
Reference number of the proposed standardized baseline:	PSB0023					
Name(s) of the Party or Parties to which the proposed standardized baseline applies:	Grenada					
DNA submitting the proposed standardized baseline:	Ministry of Finance, Planning, Economy, Energy, and Cooperatives, Grenada					
Name(s) of the proponent(s) of the proposed standardized baseline: (Parties, project participants, international industry organizations or admitted observer organizations)	Ministry of Finance, Planning, Economy, Energy, and Cooperatives, Grenada					
History of the submission:	 13/10/2014: first submission was received 23/10/2014: initial assessment has been concluded 19/11/2015: second submission was received 18/07/2016: third submission was received 05/09/2016: fourth submission was received 23/09/2016: fifth submission was received 					
Date (DD/MM/YYYY) when the recommendation is completed:						
Approach for the development of the proposed standardized baseline:						
 The "Guidelines for the establishment of sector specific standardized baselines" (Version 2.0) A methodological approach contained in an approved baseline and monitoring methodology (Please specify below the exact reference (number, title and version) of the approved methodology A methodological approach contained in an approved methodological tool "Tool to calculate the emission factor for an electricity system" (version 05.0.0) The "Guideline: Establishment of standardized baselines for afforestation and reforestation project activities under the CDM" 						
Important conditions under which the proposed standardized baseline is applicable:						

2. The scope of this standardized baseline covers the grid emission factors for the electricity systems of Grenada. It was derived using the ex ante data vintage option of the version 05.0.0 of the "Tool to calculate the emission factor for an electricity system" based on 2010-2012 data vintage.

Clean development mechanism (CDM) project activities and programmes of activities (hereinafter 3. referred as project activities) can apply this standardized baseline under the following conditions:

(a) The project activity is implemented in Grenada and is connected to the project electricity system;

The CDM approved methodology that is applied to the project activity requires the determination of (b) CO2 emission factor(s) through the application of the "Tool to calculate the emission factor for an electricity system" (hereinafter referred to as "the tool");

The project activity uses ex ante option for the grid emission factor as indicated in the tool i.e. no (c) monitoring and recalculation of the emissions factor during the crediting period is required.

4. Project participants who do not wish to use this standardized baseline may alternatively estimate their own values for the grid emission factor, by applying the latest applicable version of the tool.

Summary description of the proposed standardized baseline:

This standardized baseline provides values for the parameters mentioned in table 1.

Table 1. Grid emission factors for the electricity systems of the three islands of Grenada: Grenada, Carriacou, Petit Martinique

	Applicable values			ues		
Paramete r	Unit	Description	Applicable project types	First crediting period	Second crediting period	Third crediting period
EF _{grid,} Simplified CM	tCO ₂ /MW h	Simplified combined margin CO ₂ emission factor for the project electricity system of the island Grenada	All project activities	0.634	0.634	0.634
EF _{grid,} Simplified CM	tCO₂/MW h	Simplified combined margin CO ₂ emission factor for the project electricity system of the island Carriacou	All project activities	0.675	0.675	0.675
EF _{grid,} Simplified CM	tCO ₂ /MW h	Simplified combined margin CO ₂ emission factor for the project electricity system of the island Petit Martinique	All project activities	0.890	0.890	0.890

Recommendation to the Board:

In approve the draft standardized baseline

Not to approve the draft standardized baseline

Reasons for not approving the proposed standardized baseline:

Any other issues arising from the review of the proposed standardized baseline:

Document information

Version	Date	Description
02.0	1 December 2013	The document title has changed from "CDM recommendation form for proposed standardized baselines" (F-CDM-PSB-REC) to "Proposed standardized baseline recommendation submission form" (CDM-PSBR-FORM).
		Revision to
		 Reflect updated requirements in the "Procedure: Development, revision, clarification and update of standardized baselines";
		 Include an editorial improvement.
01.0	23 March 2012	Initial publication.
