

CDM-POA9672-RULE01

Ruling note

Rationale for the rejection of PRC-9672-003

Version 01.0

United Nations
Framework Convention on
Climate Change

1. The CDM-Executive Board decided to reject the proposed request for post-registration changes for CDM Programme of Activity (PoA) 9672 on 24 July 2018, in accordance with *the CDM project cycle procedure for programme of activities* (CDM-EB93-A09-PROC, ver. 01.0), paragraph 162 (b) and 163 (the procedures).

- a) The request for post-registration change “PRC-9672-003: Paradigm Sub Saharan Africa Cook Stove Programme”, proposed a correction to update the baseline data applied for the calculation of the parameter “Quantity of woody biomass used in the absence of the project activity (B_{old}) for Ethiopia. The B_{old} is proposed to be revised from 3.45 tons of wood fuel/household to 4.41 tons of wood fuel/household.

The DOE (ERM CVS) failed to demonstrate compliance with the requirements of the applicable methodology as mentioned in paragraph (b) below.

- b) The relevant requirement(s) are as follows:
The applicable methodology (AMS-II.G. ver. 05 paragraph 31) states that “Monitoring approaches for $B_{y,savings}$ (Option 1, 2 or 3 in paragraph 12), and values for parameters f_{NRB} (when Option (a) in paragraph 30 is chosen) and the quantity of woody biomass B_{old} , may be determined either at the CPA level before the inclusion of CPA or at the PoA level before the registration of the PoA-DD.”

- c) The reason and rationale for the final decision is:
- i. The PoA registration, along with CPA 9672-0001 inclusion, was on 01/07/2013,
 - ii. The PRC proposes to update B_{old} by applying household size data from year 2015, which is after the registration and inclusion date for PoA-DD and CPA 9672-0001,
 - iii. Paragraph 31 of the applicable methodology (AMS-II.G. ver. 05) requires that the value for the parameter B_{old} to be determined either at the CPA level before the inclusion of CPA or at the PoA level before the registration of the PoA-DD.
