

# Standardized Crediting Framework

Technical workshop
"New Approaches to Carbon Crediting"
Bonn Germany, Sept. 20-21, 2018

### **Carbon Initiative for Development**

- Results-based payments for emission reductions
- Energy access in low-income countries with private sector focus
- About \$100m committed for ER purchases out of 10 energy access programs in Sub-Saharan Africa
- Use of CDM standard pre-2020 and new standard (Art. 6) post-2020
- Standardized Crediting Framework (SCF): key Ci-Dev innovation for new generation carbon crediting post-2020; Pre-2020 piloting.

### **SCF Objectives**

#### I. Facilitate program implementation – Ci-Dev and replication

- Strengthen host country implementation capacity & ownership
- Reduce transaction costs and improve access to crediting
- Enable replication of Ci-Dev projects at various scales
- Open up to different business models (private & public sector driven).

#### II. Leverage program financing

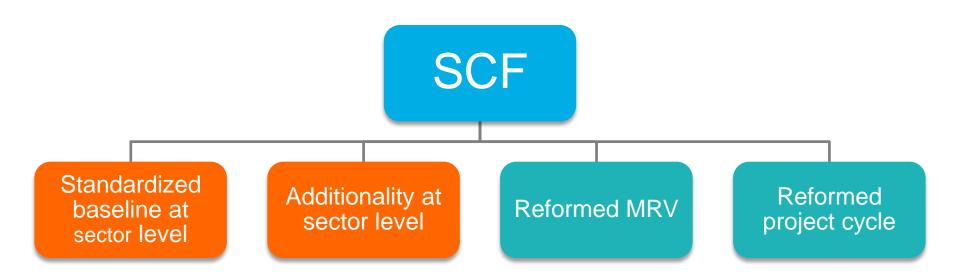

- De-risk crediting and facilitate integration with investment finance
- Attract other public climate finance private finance

#### III. Pilot new mechanisms and facilitate transition

- Build on standardized baselines, PoAs & Ci-Dev technical innovation
- Pilot new mechanisms and inform UNFCCC Art.6 negotiations
- Integrate host countries NDCs
- Facilitate post 2020 Ci-Dev portfolio transition

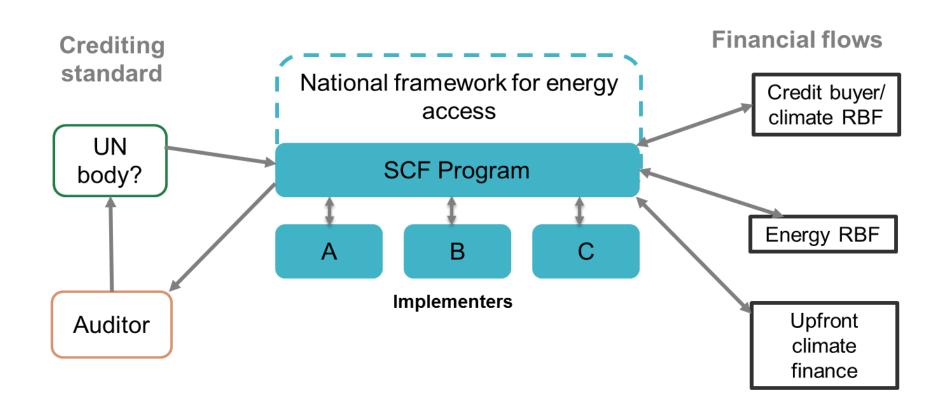

### **SCF Components**

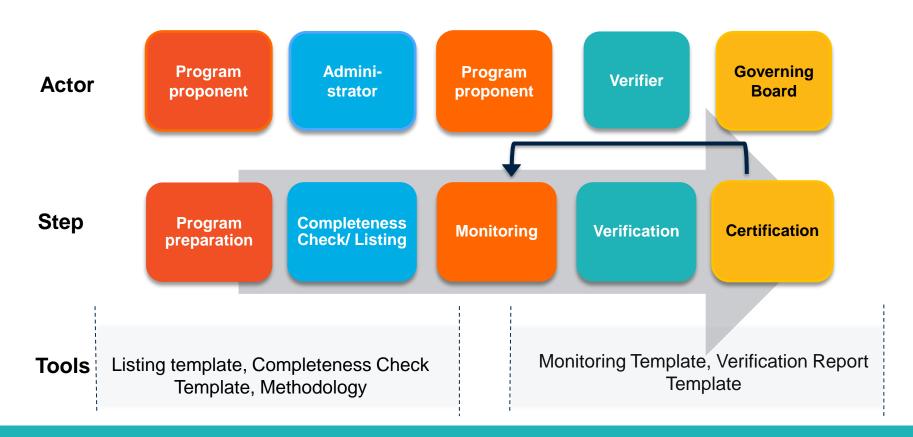

### Structure of an SCF program

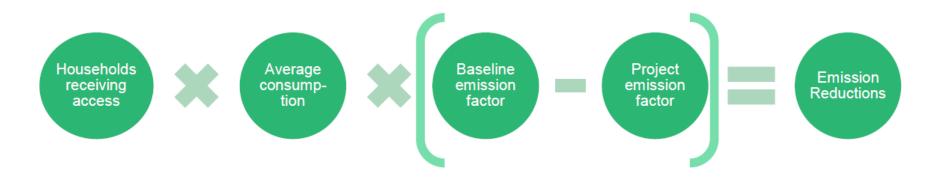

# **Streamlined SCF program cycle**

Combines validation & verification, so crediting starts earlier; no "inclusion" required for new activity locations; simplified templates

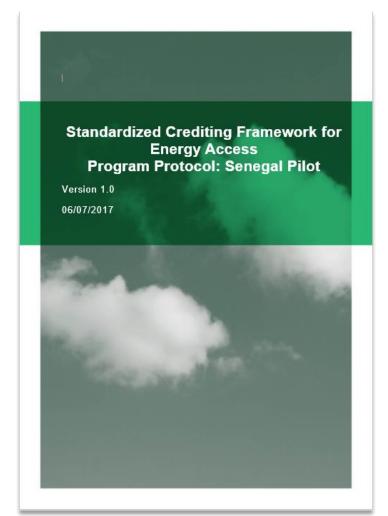

# Standardized ER determination per unit

# **Piloting the SCF**
