I'm sending this email for an inquiry about the process of our company's CDM project. Here is a summary of the current project status: 1. Company B concluded a methane capture facility installation/operation contract with some (about one third) of the landfill sites of country A and registered it as a CDM project. (once renewed); 2. Company B does not currently operate nor manage long-term methane capture facilities, and therefore A country will cancel the contract with company B including the CDM project. 3. According to the clause 2, country A is promoting a contract with C company including installation and operation of methane capture facilities and development using capture gas and landfill as a whole. In the above situation, the questions are as follows: 1) If the greenhouse gas reduction activities were not carried out due to the non-operation of the landfill of company B and the CDM project was canceled due to a breach of the contract with country A, is it possible that the CDM project can be re-registered or not? 2) If the question 1) is not acceptable, is it still possible that the project can be registered if the amount of methane avoidance
