Re.: Request to reconsider the assessment of NM0378 - "green plastics"

Dear Mr. Xavier,

In response to your communication of 24 April 2020, I would like to inform you that the CDM Executive Board (the Board), at its 106th meeting, considered the proposed new methodology "NM0378: Use of renewable sources of carbon instead of fossil sources in the production of thermoplastic resins and its components" and requested the Methodologies Panel to further analyse the methodology submission based on the feedback provided in the meeting. The Board also requested the Methodologies Panel to analyse the methodology "AM0027: Substitution of CO₂ from fossil or mineral origin by CO₂ from renewable sources in the production of inorganic compounds" together with the proposed new methodology NM0378.

Thank you once again for contacting the Board with your request.

Yours sincerely,

Rajesh Sethi
Secretary to the CDM Executive Board
