Re.: Confirmation to use AMS-I.E. version 10.1 in the RCP updating of the PoA DD (re: SSC_756) thereby allowing the eligibility of solar electric cookers under the PoA

Dear Mr. Farmer,

I would like to thank you for your communication of 1 July 2020 with regard to PoA 7014: Improved Cook Stoves for East Africa (ICSEA). Your communication has been made available to the CDM Executive Board (the Board) in accordance with the relevant provision of the procedure for direct communication with stakeholders.¹

As stated in the “CDM project standard for programmes of activities” (version 02.0) paragraph 295, in general the coordinating/managing entity wishing to combine a request for approval of changes to the registered PoA with a request for renewal of the PoA period may submit combined requests, however such intended post-registration change shall also meet related requirements as specified under this procedure. With this, I would like to bring to your attention that a clarification has already been provided to you in response to your earlier communication to the Board (INQ-09016), wherein you were informed that your intended post-registration change in the context of PoA 7014 is not eligible for post-registration change.

This is also to inform you that the Board, at its 106th meeting, approved the response prepared by the Methodologies Panel to the clarification request SSC_773, where the Panel noted that it is outside its scope to determine whether a change to a PoA is eligible via a post registration change (PRC) request at/before/after the renewal of the crediting period and that the applicability of the methodology AMS-I.E. for solar induction/electric cooker has been clarified already in the response to SSC_756.²

Thank you for contacting the Board with your request.

Yours sincerely,

Rajesh Sethi
Secretary to the CDM Executive Board
