Re.: Renewable Energy Source Self-Reproduction Ratio as an UNFCCC Process Tool

Dear Mr. Matveev,

I would like to thank you for your communication of 6 July 2020 regarding Renewable Energy Source Self-Reproduction Ratio as an UNFCCC Process Tool. Your communication has been made available to the CDM Executive Board (the Board) in accordance with the relevant provision of the procedure for direct communication with stakeholders.¹

I would like to inform that the channel of communication selected by you pertains only to Clean Development Mechanism (CDM) related communication addressed to the CDM Executive Board or its secretariat that is serving the Board. As CDM is a mechanism to quantify real and measurable emission reductions based on technology interventions, it does not select specific emission reduction technologies over others based on a comparative analysis. We are forwarding your communication to the Means of Implementation Division of the UNFCCC secretariat for information, that deals with international cooperation on climate change technology development and transfer.

Thank you for contacting the Board with your request.

Yours sincerely,

Rajesh Sethi
Secretary to the CDM Executive Board
