**Subject:** Endorsement of the updated grid emission factor standardized baseline (ASB0034) for West African Power Pool

This is to confirm that the Designated National Authority (DNA) of Senegal, endorses the submission by DNA of Togo to the United Nations Framework Convention on Climate Change (UNFCCC) Secretariat of the update of a common Grid Emission Factor (GEF) for the grid interconnected countries within the West African Power Pool (WAPP).

This endorsement is without prejudice of the use of a national grid emission factor by project participants for projects in the Senegalese boundary.

Our endorsement specifically concerns the updated grid emission factor standardized baselines of WAPP which is supported by consultant of the world Bank.

Sincerely yours.

Designated National Authority
