## Standardized baseline

---

# Fraction of non-renewable biomass in Myanmar

Version 01.0

**United Nations**  
Framework Convention on  
Climate Change

<b>TABLE OF CONTENTS</b>		<b>Page</b>
<b>1. INTRODUCTION .....</b>		<b>3</b>
<b>2. SCOPE, APPLICABILITY, AND ENTRY INTO FORCE .....</b>		<b>3</b>
2.1. Scope and applicability .....		3
2.2. Entry into force and validity .....		3
<b>3. NORMATIVE REFERENCES .....</b>		<b>3</b>
<b>4. DEFINITIONS .....</b>		<b>3</b>
<b>5. PARAMETERS AND VALUES.....</b>		<b>4</b>

## 1. Introduction

1. This standardized baseline provides a value for the fraction of non-renewable biomass (fNRB), to estimate baseline emissions from Clean development mechanism (CDM) project activities and programmes of activities (hereinafter referred as project activities) in the Republic of the Union of Myanmar (hereinafter referred as Myanmar).

## 2. Scope, applicability, and entry into force

### 2.1. Scope and applicability

2. The scope of the standardized baseline covers the value of fNRB in Myanmar. It was calculated in accordance with the "TOOL30: Calculation of the fraction of non-renewable biomass", version 2.0 (hereinafter referred to as "TOOL30").
3. CDM project activities may apply this standardized baseline under the following conditions:
  - (a) The project activity is implemented in Myanmar; and
  - (b) The CDM approved methodology that is applied to the project activity requires the determination of fNRB through the application of the TOOL30 or the requirements of the methodology; and
4. Project participants who do not wish to use this standardized baseline may alternatively estimate their own values, by applying the latest applicable version of the TOOL30.

### 2.2. Entry into force and validity

5. This standardized baseline enters into force upon adoption by the CDM Executive Board on 23 December 2020. This standardized baseline is valid up to 5 years, i.e. from 23 December 2020 to 22 December 2025.

## 3. Normative references

6. This standardized baseline is based on the top-down standardized baseline TSB0015 "Baseline woody biomass consumption and fNRB for household cookstoves in Myanmar" developed in collaboration with the designated national authority (DNA) of Myanmar.
7. The standardized baselines are developed using the TOOL30.
8. For more information regarding proposed new standardized baselines as well as their consideration by the CDM Executive Board, please refer to [http://cdm.unfccc.int/methodologies/standard\\_base/index.html](http://cdm.unfccc.int/methodologies/standard_base/index.html).

## 4. Definitions

9. The definitions contained in the Glossary of CDM terms shall apply.
10. The definitions contained in the latest version of TOOL30 shall apply.

## 5. Parameters and values

11. This standardized baseline provides values for the parameter identified in table 1.

**Table 1. Standardized values for fNRB**

Parameter	Unit	Description	Applicable values	Source
fNRB	fraction	Fraction of woody biomass that can be established as non-renewable biomass	<b>0.615</b>	Based on the data provided in TSB0015 Calculated according to TOOL30

-----

### Document information

---

<i>Version</i>	<i>Date</i>	<i>Description</i>
01.0	23 December 2020	Initial publication. This standardized baseline is approved by CDM Executive Board in accordance with the "Procedure for development, revision, clarification and update of standardized baselines" (CDM-EB63-A28-PROC).
