SECTION 3: YOUR COMMUNICATION

Title/Subject
Maximum 250 characters Project re-registration

Communication Text
Include background, details, and conclusion (unlimited length)

I would like to comment on the CDM projects that have expired crediting period. It was registered CDM project, but there was no actual GHG reduction activity. I discovered a number of projects that could actually reduce greenhouse gases while excavating CDM Project, but they were already registered CDM project and had no reduction facilities and activities. If these projects are re-registered, actual greenhouse gas reduction will be active. Local residents and the Government of Host patty want to re-register the CDM project. Please provide guidelines to approve the re-registration of the CDM project only if it proves that the reduction activity has not been carried out after registration as a CDM.

Among the projects registered as CDM projects, the projects that have not issued credits after the certification period has ended are as follows:
