

**Component project activity design document form
(Version 10.0)**

Complete this form in accordance with the instructions attached at the end of this form.

BASIC INFORMATION

Title of the CPA	
Scale of the CPA	<input type="checkbox"/> Large-scale <input type="checkbox"/> Small-scale
Version number of the CPA-DD	
Completion date of the CPA-DD	
Title and UNFCCC reference number of the registered CDM PoA	
Title and reference number of the corresponding generic CPA	
Coordinating/managing entity	
Host Party	
Applied methodologies and standardized baselines	
Sectoral scopes	
Estimated amount of annual average GHG emission reductions	

SECTION A. Description of component project activity (CPA)

A.1. Purpose and general description of CPA

>>

A.2. Location of CPA

>>

A.3. Technologies/measures

>>

A.4. Coordinating/managing entity

>>

A.5. Parties and CPA implementers

Parties involved	CPA implementers	Indicate if the Party involved wishes to be considered as CPA implementer (Yes/No)
Party A (host Party)	Private entity A Public entity A ...	
Party B	Private entity B Public entity B ...	
...	...	

A.6. Public funding of CPA

>>

A.7. History of CPA

>>

A.8. Debundling

>>

SECTION B. Application of methodologies and standardized baselines

B.1. References to methodologies and standardized baselines

>>

B.2. Project boundary, sources and greenhouse gases (GHGs)

>>

	Source	GHG	Included?	Justification/Explanation
Baseline	Source 1	CO ₂		
		CH ₄		
		N ₂ O		

	Source 2	CO ₂		
		CH ₄		
		N ₂ O		

	---	---		

Project activity	Source 1	CO ₂		
		CH ₄		
		N ₂ O		

	Source 2	CO ₂

	---	---		

B.3. Establishment and description of baseline scenario

>>

B.4. Estimation of emission reductions

B.4.1. Explanation of methodological choices

>>

B.4.2. Data and parameters fixed ex ante

(Copy this table for each piece of data or parameter.)

Data/Parameter	
Data unit	
Description	
Source of data	
Value(s) applied	
Choice of data or measurement methods and procedures	
Purpose of data	
Additional comment	

B.4.3. Ex ante calculation of emission reductions

>>

B.4.4. Summary of ex ante estimates of emission reductions

Year	Baseline emissions (t CO ₂ e)	Project emissions (t CO ₂ e)	Leakage (t CO ₂ e)	Emission reductions (t CO ₂ e)
Year 1				
Year 2				
Year 3				
Year ...				
Total				
Total number of crediting years				
Annual average over the crediting period				

B.5. Monitoring plan

B.5.1. Data and parameters to be monitored

(Copy this table for each piece of data or parameter.)

Data/Parameter	
Data unit	
Description	
Source of data	
Value(s) applied	
Measurement methods and procedures	
Monitoring frequency	
QA/QC procedures	
Purpose of data	
Additional comment	

B.5.2. Sampling plan

>>

B.5.3. Other elements of monitoring plan

>>

SECTION C. Start date, crediting period type and duration

C.1. Start date of CPA

>>

C.2. Expected operational lifetime of CPA

>>

C.3. Crediting period of CPA

C.3.1. Type of crediting period

>>

C.3.2. Start date of crediting period

>>

C.3.3. Duration of crediting period

>>

SECTION D. Environmental impacts

D.1. Analysis of environmental impacts

>>

D.2. Environmental impact assessment

>>

SECTION E. Local stakeholder consultation

E.1. Modalities for local stakeholder consultation

Attachment. Instructions for completing this form

1. General instructions

1. When designing a specific-case component project activity (CPA) and completing this form, comply with the “CDM project standard for programmes of activities” (hereinafter referred to as the project standard), the applied methodologies and, where applicable, the applied standardized baselines and any other standards, methodologies, methodological tools and guidelines applied in accordance with the applied methodologies (hereinafter “any other standards, methodologies, methodological tools and guidelines (to be) applied in accordance with the applied(selected) methodologies” are collectively referred to as the other (applied) methodological regulatory documents). The “Rules and Reference” section of the UNFCCC CDM website contains all regulatory documents for the CDM, such as standards (including methodologies and standardized baselines), procedures, methodological tools, guidelines, clarifications, forms and the “Glossary of CDM terms” that may be applicable to the CPA.
2. Use this form for both large-scale and small-scale CPAs, except for afforestation and reforestation CPAs and carbon dioxide capture and storage CPAs. In this regard, indicate the scale of the CPA on the cover page as per the instructions below.
3. When designing a CPA, apply the requirements defined in the corresponding generic CPA and other relevant requirements for the programme of activities (PoA).
4. For a small-scale CPA, if the coordinating/managing entity wishes to propose the CPA with more than one component (e.g. one component for methane capture applying AMS-III.D together with another component for grid connected electricity generation applying AMS-I.D), each belonging to one of the three small-scale or microscale project types (Type I, Type II and Type III), provide information on each component separately in the sections indicating so in the instructions below and, as appropriate, in any other sections of this form.
5. To include a CPA to a registered PoA, submit this form to a DOE for validation, or if the coordinating/managing entity indicated in the PoA-DD that it will include CPAs without validation by a DOE in accordance with the “CDM project cycle procedure for programmes of activities”, submit it directly to the secretariat.
6. When documenting the changes that occurred to the CPA in accordance with the applicable provisions relating to post-registration changes, prepare two versions of the CPA-DD using this form, one in clean version and the other version indicating the changes to the previously uploaded CPA-DD (i.e. the CPA-DD at inclusion, renewal of the crediting period or the last post-registration change, whichever the latest) in track-change. In addition, provide a summary of the changes in Appendix 6 below.
7. Where a CPA-DD contains information that the coordinating/managing entity wishes to be treated as confidential/proprietary, submit documentation in two versions:
 - (a) One version where all parts containing confidential/proprietary information are made illegible (e.g. by covering those parts with black ink) so that the version can be made publicly available without displaying confidential/proprietary information;
 - (b) A version containing all information that is to be treated as strictly confidential/proprietary by all parties handling this documentation (designated operational entities (DOEs), Board members, panel and working group members, external experts requested to consider such documents, and the secretariat).

8. Information used to demonstrate additionality, to describe the application of the selected methodologies, selected standardized baselines and the other methodological regulatory documents, and to support the environmental impact assessment, is not considered proprietary or confidential. Make any data, values and formulae included in spreadsheets provided accessible and verifiable.
9. Complete this form in English. Prepare all attached documents in English, or if their originals were prepared in other language, provide a full translation of the relevant sections of these documents in English.
10. Complete this form using the same format without modifying its font, headings or logo, and without any other alteration to the form.
11. Do not modify or delete tables and their columns in this form. Add rows of the tables as needed. Add additional appendices as needed.
12. If a section of this form is not applicable, explicitly state that the section is left blank intentionally.
13. Use an internationally recognized format for presentation of values. For example, use digits grouping in thousands and mark a decimal point with a dot (.), not with a comma (,).
14. Complete this form deleting this Attachment.

2. Specific instructions

1. Provide the following information on the cover page:
 - (a) Title of the CPA and its unique identification (e.g. sequential number);
 - (b) Scale of the CPA (large-scale or small-scale);
 - (c) Version number of the CPA-DD;
 - (d) Completion date of the CPA-DD (dd/mm/yyyy);
 - (e) Title and UNFCCC reference number of the registered CDM PoA;
 - (f) Title and reference number of the corresponding generic CPA;
 - (g) Name of the coordinating/managing entity;
 - (h) Name of the host Party;
 - (i) Titles and UNFCCC reference numbers of the applied methodologies and, where applicable, the applied standardized baselines;
 - (j) Sectoral scopes linked to the applied methodologies and relevant to the CPA, clearly indicating mandatory sectoral scopes and if applicable, conditional sectoral scopes for the project activity.
 - (k) Estimated amount of annual average GHG emission reductions during the crediting period (t CO₂e).

SECTION A. Description of component project activity (CPA)

A.1. Purpose and general description of CPA

1. Provide the purpose and general description of the CPA, including a summary of:
 - (a) The location of the CPA;
 - (b) The technologies/measures to be employed and/or implemented by the CPA;
 - (c) The project boundary;
 - (d) The baseline scenario;
 - (e) The estimates of annual average and total GHG emission reductions for the chosen crediting period.
 2. Provide a full description of 1(a)–(e) above in sections A.2, A.3, B.2, B.3 and B.4 below, respectively.
- Additional specific instructions for small-scale CPAs:**
3. Indicate the small-scale project type (Type I, Type II and/or Type III) applicable to the CPA in accordance with the corresponding generic CPA.
 4. If applicable, indicate and demonstrate that the CPA qualifies for a microscale project type (Type I, Type II and/or Type III) in accordance with the corresponding generic CPA.
 5. If there is more than one component in the CPA, indicate the small-scale or microscale project type for each component separately in accordance with the corresponding generic CPA.

A.2. Location of CPA

1. Provide details of the physical/geographical location of the CPA, including physical address (host Party, region/state/province, city/town/community, street name and number) and a map, and if necessary, other information allowing for the unique identification of the CPA (e.g. geographic coordinates).
2. Provide proof that the CPA is located within the geographical boundary of the PoA.
3. Do not exceed one page for the description of location.

A.3. Technologies/measures

1. Describe the technologies/measures to be employed and/or implemented by the CPA in accordance with the corresponding generic CPA, including:
 - (a) A list of the facilities, systems and equipment that will be installed and/or modified by the CPA;
 - (b) The types and levels of services (such as the amount of certain type of cement produced or the amount of electricity fed into the electricity grid) provided by the facilities, systems and equipment and their relation, if any, to other facilities, systems and equipment outside the project boundary;
 - (c) The arrangement of the facilities, systems and equipment;
 - (d) The age and average lifetime of the equipment based on the manufacturer's specifications and industry standards that are within the range specified in the corresponding generic CPA;
 - (e) The installed capacities, load factors and efficiencies that are within the range specified in the corresponding generic CPA;
 - (f) The energy and mass flows and balances of the facilities, systems and equipment, if necessary;
 - (g) The monitoring equipment and their location in the systems.
2. Describe the technologies/measures existing prior to the implementation of the CPA at the same site, as applicable, including the equivalent information listed in paragraph 1 above on the facilities, systems and equipment;
3. Provide a short summary of the baseline scenario as established in section B.3 below, including the equivalent information listed in paragraph 1 above.
4. Do not provide information that is not essential to understanding the purpose of the CPA and how it reduces GHG emissions. Do not include information related to facilities, systems and equipment that are auxiliary to the main scope of the CPA and do not affect directly or indirectly GHG emissions and/or mass and energy balances of the processes related to the CPA.

Additional specific instructions for small-scale CPAs:

5. If there is more than one component in the CPA, provide the information for each component separately.

A.4. Coordinating/managing entity

1. Provide the name of the coordinating/managing entity of the PoA.

A.5. Parties and CPA implementers

1. Using the table, list the Parties and CPA implementers involved in the CPA, and provide contact information of the CPA implementers in Appendix 1 below. CPA implementers are the entities/individuals responsible for the operation of the CPA, and may or may not be the project participants recorded at the PoA level or the coordinating/managing entity.

A.6. Public funding of CPA

1. Indicate whether the CPA receives public funding. If any public funding is received, provide information on the sources of the public funding.
2. If the public funding received is from Parties included in Annex I to the Convention, attach in Appendix 2 below the affirmation obtained from such Parties in accordance with the applicable provisions in the project standard.

A.7. History of CPA

1. Confirm that:
 - (a) The proposed CPA is neither registered as a CDM project activity nor included in another registered CDM PoA;
 - (b) The proposed CPA is not a project activity that has been deregistered.
2. Declare whether:
 - (a) The proposed CPA was a CPA that has been excluded from a registered CDM PoA;
 - (b) A registered CDM project activity or a CPA under a registered CDM PoA whose crediting period has or has not expired (hereinafter referred to as former project) exists in the same geographical location as the proposed CPA.
3. If the declaration on 2(a) or 2(b) above is positive, demonstrate that the proposed CPA meets all conditions for inclusion in the PoA in accordance with the applicable provisions in the project standard relating to re-inclusion of an excluded CPA in a registered CDM PoA or inclusion of a CPA that is in the same geographical location as a former project.

A.8. Debundling

1. For large-scale CPAs, indicate 'Not applicable'.
2. For small-scale CPAs, demonstrate that the CPA is not a debundled component of a large-scale project activity or CPA in accordance with the applicable provisions in the "Methodological tool: Assessment of debundling for SSC project activities".

SECTION B. Application of methodologies and standardized baselines***Additional specific instructions for small-scale CPAs:***

1. If there is more than one component in the small-scale CPA, provide the information for each component separately in the entire section B.

B.1. References to methodologies and standardized baselines

1. Indicate the exact references (titles, versions and UNFCCC reference numbers) of:
 - (a) The selected methodologies (e.g. ACM0001: "Large-scale Consolidated Methodology: Flaring or use of landfill gas" (Version 18.0));
 - (b) Any other methodologies or methodological tools to which the selected methodologies refer (e.g. "Tool07 "Tool to calculate the emission factor for an electricity system" (Version 05.0));
 - (c) The selected standardized baselines, where applicable (e.g. ASB0001 "Standardized baseline: Grid emission factor for the Southern African power pool" (Version 01.0)).
2. Refer to the corresponding generic CPA for the exact reference of approved methodologies, methodological tools and standardized baselines.

B.2. Project boundary, sources and greenhouse gases (GHGs)

1. Define the project boundary of the CPA, including physical delineation of the CPA, and which sources and GHGs are included in the project boundary, in accordance with the modalities in the corresponding generic CPA.
2. Use the table in the form to describe emission sources and GHGs included in the project boundary for the purpose of calculating project emissions, baseline emissions and, if applicable, leakage emissions.
3. In addition to the table, where possible, present a flow diagram of the project boundary based on the descriptions provided in section A.3 above and in accordance with the corresponding generic CPA. Include in the flow diagram all the facilities, systems and equipment, and flows of mass and energy described in that section. In particular, indicate in the diagram the emissions sources and GHGs included in the project boundary and the data and parameters to be monitored.

B.3. Establishment and description of baseline scenario

1. Describe the baseline scenario for the CPA and explain how it is established in accordance with the modalities in the corresponding generic CPA.
2. Provide a list of facilities, systems and equipment in the baseline scenario, and clearly explain how the same types and levels of services provided by the CPA as elaborated in section A.3 above would have been provided in the baseline scenario.
3. Provide a transparent description of the baseline scenario as established above.

B.4. Estimation of emission reductions**B.4.1. Explanation of methodological choices**

1. Explain how the modalities in the corresponding generic CPA for calculating baseline emissions, project emissions, leakage emissions and emission reductions are applied to the CPA. Clearly state which equations will be used in calculating emission reductions.

B.4.2. Data and parameters fixed ex-ante

1. Include a compilation of information on the data and parameters that are not monitored during the crediting period of the CPA but are determined before the inclusion of the CPA in the PoA and remain fixed throughout the crediting period, in accordance with the corresponding generic CPA. Do not include here data that will only become available with the implementation of the CPA (e.g. measurements after the implementation of the CPA), but include them in the table in section B.5.1 below.
2. The compilation of information may include data that are measured or sampled, and data that are collected from other sources (e.g. official statistics, expert judgment, proprietary data, IPCC, commercial and scientific literature, etc.). Do not include data that are calculated with equations provided in the applied methodologies or default values specified in the methodologies in the compilation.
3. For each piece of data or parameter, complete the table, following the instructions below:
 - (a) "Value(s) applied": provide the value applied. Where a time series of data is used, where several measurements are undertaken or where surveys have been conducted, provide detailed information in Appendix 3 below. To report multiple values referring to the same data or parameter, use one table. If necessary, use references to spreadsheets;
 - (b) "Source of data": indicate and justify the choice of data source. Provide clear and valid references and, where applicable, additional documentation in Appendix 3 below;
 - (c) "Measurement methods and procedures": where values are based on measurement, include a description of the measurement methods and procedures applied (e.g. which standards have been used), indicate the responsible person/entity that undertook the measurement, the date of the measurement and the measurement results. More detailed information can be provided in Appendix 3 below;
 - (d) "Purpose of data": choose one of the following:
 - (i) Calculation of baseline emissions;
 - (ii) Calculation of project emissions;
 - (iii) Calculation of leakage.

B.4.3. Ex ante calculation of emission reductions

1. Provide a transparent ex ante calculation of baseline emissions, project emissions (or, where applicable, direct calculation of emission reductions) and leakage emissions expected during the crediting period of the CPA, applying all relevant equations provided in the applied methodologies, the applied standardized baselines and the other applied methodological regulatory documents, in accordance with the corresponding generic CPA. For data or parameters available before the inclusion of the CPA in the PoA, use values contained in the table in section B.4.2 above.
2. For data or parameters not available before the inclusion of the CPA in the PoA and to be monitored during the crediting period of the CPA, use estimates contained in the table in section B.5.1 below. If any of these estimates has been determined by a sampling approach, provide a description of the sampling efforts undertaken in accordance with the "Standard: Sampling and surveys for CDM project activities and programme of activities".
3. Document how each equation is applied, in a manner that enables the reader to reproduce the calculation. Where relevant, provide additional background information and/or data in Appendix 3 below, including relevant spreadsheets.
4. Provide a sample calculation for each equation used.

B.4.4. Summary of ex ante estimates of emission reductions

1. Summarize the results of the ex ante calculation of emission reductions for all years of the crediting period of the CPA, using the table in the form.

Additional specific instructions for small-scale CPAs:

2. If the small-scale CPA contains more than one component, provide a separate table for each component. In addition, provide a table showing the aggregate emission reductions of the CPA.

B.5. Monitoring plan

1. Through sections B.5.1–B.5.3 below, provide a detailed description of the monitoring plan for the CPA developed in accordance with the corresponding generic CPA.
2. If the coordinating/managing entity chooses to delay the submission of the monitoring plan in accordance with the applicable provisions in the project standard, clearly state that the submission of the monitoring plan is delayed and that this form does not contain information related to the monitoring plan.

B.5.1. Data and parameters to be monitored

1. Include specific information on how the data and parameters that need to be monitored in accordance with the applied methodologies, the applied standardized baselines and the other applied methodological regulatory documents, will actually be collected during monitoring, in accordance with the corresponding generic CPA. Include here data and parameters that are determined only once for the crediting period of the CPA but that will become available only after the implementation of the CPA.
2. For each piece of data or parameter, complete the table, following the instructions below:
 - (a) “Source of data”: indicate the source(s) of data that will be used for the CPA (e.g. which exact national statistics). Where several sources are used, justify which data sources should be preferred;
 - (b) “Value(s) applied”: the value applied is an estimate of the data or parameter that will be monitored during the crediting period of the CPA, but is used for the purpose of calculating estimated emission reductions in sections B.4.3 and B.4.4 above. To report multiple values referring to the same data or parameter, use one table. If necessary, use references to spreadsheets;
 - (c) “Measurement methods and procedures”: where data or parameters are to be monitored, specify the measurement methods and procedures, standards to be applied, accuracy of the measurements, person/entity responsible for the measurements, and, in case of periodic measurements, the measurement intervals;
 - (d) “QA/QC procedures”: describe the Quality Assurance (QA)/Quality Control (QC) procedures to be applied, including the calibration procedures, where applicable;
 - (e) “Purpose of data”: choose one of the following:
 - (i) Calculation of baseline emissions;
 - (ii) Calculation of project emissions;
 - (iii) Calculation of leakage emissions.
3. Provide any relevant further background documentation in Appendix 4 below.

B.5.2. Sampling plan

1. If data and parameters monitored in section B.5.1 above are to be determined by a sampling approach, provide a description of the sampling plan in accordance with the corresponding generic CPA.

B.5.3. Other elements of monitoring plan

1. Describe the other elements of the monitoring plan as outlined in the project standard in accordance with the corresponding generic CPA, including the operational and management structure for monitoring, provisions for data archiving, and responsibilities and institutional arrangements for data collection and archiving.
2. Provide any relevant further background information in Appendix 4 below.

SECTION C. Start date, crediting period type and duration**C.1. Start date of CPA**

1. State the start date of the CPA in the format of dd/mm/yyyy.
2. Describe how the start date has been determined in accordance with the definition of start date provided in the “Glossary: CDM terms”, and provide evidence to support this date.
3. Confirm that the start date of the CPA is on or after the start date of the PoA by referring to the date of the latter.

C.2. Expected operational lifetime of CPA

1. State the expected operational lifetime of the CPA in years and months.

C.3. Crediting period of CPA**C.3.1. Type of crediting period**

1. State the type of crediting period (renewable or fixed) chosen for the CPA in accordance with the corresponding generic CPA.
2. For the renewable crediting period type, indicate whether it is the first, second or third crediting period.

C.3.2. Start date of crediting period

1. State the start date of the crediting period of the CPA in the format of dd/mm/yyyy. Do not attach any qualifications to the start date, such as "expected".

C.3.3. Duration of crediting period

1. State the length of the crediting period of the CPA in years and months in accordance with the corresponding generic CPA.

SECTION D. Environmental impacts**D.1. Analysis of environmental impacts**

1. If the analysis of the environmental impacts was carried out at the CPA level as indicated in the PoA-DD, provide a summary of the analysis and references to all related documentation, including those on transboundary impacts.
2. For a small-scale CPA, provide a summary of the analysis of the environmental impacts if such analysis is required by the host Party. If such analysis was not carried out, indicate "Not applicable" and provide a justification.
3. If the analysis of the environmental impacts was carried out for the whole PoA, indicate so.

D.2. Environmental impact assessment

1. If an environmental impact assessment was carried out at the CPA level in accordance with the applicable provisions in the project standard, provide conclusions and references to all related documentation. If an environmental impact assessment was not carried out, indicate "Not applicable" and provide a justification.
2. If an environmental impact assessment was carried out for the whole PoA, indicate so.

SECTION E. Local stakeholder consultation**E.1. Modalities for local stakeholder consultation**

1. If the local stakeholder consultation was carried out at the CPA level as indicated in the PoA-DD, follow the instructions in 2–5 below.
2. If there are host Party rules on local stakeholder consultations applicable to the CPA, provide a summary of the consultations carried out under the host Party rules, including the direct positive and negative impacts identified and how the negative impacts identified will be addressed. If such host Party rules do not exist, follow the instructions in 3–5 below.
3. Describe the process of the local stakeholder consultation undertaken for the CPA and demonstrate how the process complies with the relevant requirements in the project standard regarding:
 - (a) The scope of local stakeholder consultation;
 - (b) The minimum group of stakeholders to be involved;
 - (c) The means for inviting stakeholders' participation;
 - (d) The information to be made available to stakeholders;
 - (e) The conduct of consultation.
4. For 3(b) above, provide evidence that invitations were sent to the relevant stakeholders and that their comments were invited. If any of the relevant stakeholders were not invited, provide an appropriate justification.
5. For 3(c) above, describe the steps/actions taken to invite comments, taking into account local and national circumstances.
6. If the local stakeholder consultation was carried out for the whole PoA, indicate so.

E.2. Summary of comments received

1. If the local stakeholder consultation was carried out at the CPA level:
 - (a) Prepare a summary report of the comments received during the consultation and attach the report as Appendix 5 below;
 - (b) Provide an executive summary of the comments in this section;
 - (c) Describe complaints from local stakeholders, if any, submitted to the DNA of the host Party and forwarded through the DOE on the handling of the outcome of the local stakeholder consultation.
2. If the local stakeholder consultation was carried out for the whole PoA, indicate "Not applicable".

E.3. Consideration of comments received

1. If the local stakeholder consultation was carried out at CPA level, describe how the comments and, where applicable, complaints provided by local stakeholders have been taken into account in the CPA-DD or in the revised CPA-DD, including a justification if any comments were not incorporated.
2. If the local stakeholder consultation was carried out for the whole PoA, indicate "Not applicable".

SECTION F. Eligibility for inclusion

1. For the columns "Eligibility criterion - Category", "Eligibility criterion - Required condition" and "Supporting evidence for inclusion", replicate the information from the corresponding generic CPA-DD.
2. For the column "Description of this CPA in relation to the criterion and supporting evidence", describe how the CPA meets the respective criterion and provide supporting evidence.
3. Add rows to the table as necessary.

Appendix 1. Contact information of CPA implementers

1. For each CPA implementer listed in section A.5 above, complete the table. Copy and paste the table as needed.

Appendix 2. Affirmation regarding public funding

1. If applicable, attach the affirmation obtained from Parties included in Annex I to the Convention providing public funding to the CPA.

Appendix 3. Further background information on ex ante calculation of emission reductions

1. Provide any further background information on the ex ante calculation of emission reductions. This may include data, measurement results, data sources, etc.

Appendix 4. Further background information on monitoring plan

1. Provide any further background information used in the development of the monitoring plan. This may include tables with time series data, additional documentation of measurement equipment, procedures, etc.

Appendix 5. Summary report of comments received from local stakeholders

1. If the local stakeholder consultation was carried out at the CPA level, provide a summary report of comments received from local stakeholders on the CPA during and, if any, after the consultation. In the report, also identify stakeholders who have made comments, including comments forwarded by the DNA of the host Party.

Appendix 6. Summary of post-registration changes

1. Provide a summary of the post-registration changes being proposed in this version of the CPA-DD, and where applicable, the history of all post-registration changes to the CPA after its inclusion. For all post-registration changes, include reasons for the changes, impacts of the changes on the relevant CDM requirements in accordance with the project standard, and any additional information relating to the changes.
